

Program Guidebook

Master of Science in Accounting, Auditing Specialization

The Master of Science in Accounting (MAcc) degree is a competency-based program that provides advanced accounting knowledge and skills for a successful career as a professional accountant in public accounting, industry, government, and non-profit organizations. Graduates of the program will obtain substantial knowledge in a wide range of subject matter that can lead to a career in financial accounting, financial analysis, corporate treasury, tax accounting, auditing, and forensic examination, to name a few. After completing five foundational courses, learners will have the option to pursue one of four tracks: Financial Reporting, Taxation, Auditing, or Management Accounting. Each of these tracks is designed to prepare learners to sit for one or more of the following: the Certified Public Accountant (CPA) Evolution exam, the Certified Management Accounting (CMA) exam, the Certified Internal Auditor (CIA) exam and/or the Certified Fraud Examiners exam.

Understanding the Competency-Based Approach

Practically speaking, how do competency-based programs like those offered at Western Governors University (WGU) work? Unlike traditional universities, WGU does not award degrees based on completion of a certain number of credit hours or a certain set of required courses. Instead, you will earn your degree by demonstrating your skills, knowledge, and understanding of important concepts.

Progress through a degree program is governed not by the amount of time you spend in class but by your ability to demonstrate mastery of competencies as you complete required courses. Of course, you will need to engage in learning experiences as you review competencies or develop knowledge and skills in areas in which you may be weak. To help you acquire the knowledge and skills you need to complete your courses and program, WGU provides a rich array of learning resources. Your program mentor will work closely with you to help you understand the competencies required for your program and to help you create a schedule for completing your courses. You will also work closely with course instructors as you engage in each of your courses. As subject matter experts, course instructors will guide you through the content you must master to pass the course assessments.

The benefit of this competency-based system is that it enables students who are knowledgeable about a particular subject to make accelerated progress toward completing a degree, even if they lack college experience. You may have gained skills and knowledge of a subject while on the job, accumulated wisdom through years of life experience, or already taken a course on a particular subject. WGU will award your degree based on the skills and knowledge that you possess and can demonstrate—not the number of credits hours on your transcript.

Accreditation

Western Governors University is the only university in the history of American higher education to have earned accreditation from four regional accrediting commissions. WGU's accreditation was awarded by (1) the Northwest Commission on Colleges and Universities, (2) the Higher Learning Commission of the North Central Association of Colleges and Schools, (3) the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, and (4) the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges. The university's accreditation status is now managed by the Northwest Commission on Colleges and Universities (NWCCU), which reaffirmed WGU's accreditation in February 2020. The WGU Teachers College is accredited at the initial-licensure level by the Council for the Accreditation of Educator Preparation (CAEP) and by the Association for Advancing Quality in Educator Preparation (AAQEP). The nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE). The Health Information Management program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The College of Business programs are accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

The Degree Plan

The focus of your program is your personalized Degree Plan. The Degree Plan is a detailed blueprint of the courses you will need to complete in order to earn your degree. The Degree Plan also lays out the accompanying learning resources and assessments that compose your program. The list of courses in the Degree Plan is often referred to as the standard path. The amount of time it takes to complete your program depends on both the amount of new information you need to learn and the amount of time you plan to devote each week to study. Your program mentor and course instructors will help you assess your strengths and development needs to establish a study plan.

Students vary widely in the specific skills and information they need to learn. For example, some students may be highly knowledgeable in a particular subject matter and would not need to engage in new learning opportunities. Other students may find that portions of the program require them to learn new information and that they need to take an online class or participate in a study module to acquire the knowledge and skills needed to fulfill program competencies in that area. Some individuals may be able to devote as little

as 15–20 hours per week to the program, while others may need to devote more time. For this reason, pre-assessments are there to help your program mentor form a profile of your prior knowledge and create a personalized Degree Plan.

How You Will Interact with Faculty

At WGU, faculty serve in specialized roles, and they will work with you individually to provide the guidance, instruction, and support you will need to succeed and graduate. As a student, it is important for you to take advantage of this support. It is key to your progress and ultimate success. Upon your enrollment, you will be assigned a program mentor—an expert in your field of study who will provide you with regular program-level guidance and support from the day you start until the day you graduate. Your program mentor will set up regular telephone appointments (weekly at first) with you, which you will be expected to keep. The mentor will review program competencies with you and work with you to develop a plan and schedule for your coursework. Your program mentor will serve as your main point of contact throughout your program—helping you set weekly study goals, recommending specific learning materials, telling you what to expect in courses, and keeping you motivated. In addition to regular calls, your program mentor is available to help you resolve questions and concerns as they arise.

You will also be assigned to a course instructor for each course. Course instructors are doctoral-level subject matter experts who will assist your learning in each individual course. When you begin a new course, your assigned course instructor will actively monitor your progress and will be in touch to offer one-on-one instruction and to provide you with information about webinars, cohort sessions, and other learning opportunities available to help you acquire the competencies you need to master the course. Your course instructor can discuss your learning for the course, help you find answers to content questions, and give you the tools to navigate the course successfully. In addition, you will communicate with course instructors by posting in the online learning community and participating in live discussion sessions such as webinars and cohorts.

For many of the courses at WGU, you will be required to complete performance assessments. These include reports, papers, presentations, and projects that let you demonstrate your mastery of the required competencies. A separate group of faculty members, called evaluators, will review your work to determine whether it meets requirements. Evaluators are also subject matter experts in their field of evaluation. If your assessment needs further work before it “passes,” these evaluators, who review your work anonymously, will provide you with instructional feedback to help you meet evaluation standards and allow you to advance.

Connecting with Other Mentors and Fellow Students

As you proceed through your Degree Plan, you will have direct contact with multiple faculty members. These communications can take a variety of forms, including participation in one-on-one discussions, chats in the learning communities, and live cohort and webinar opportunities. As a WGU student, you will have access to your own personal MyWGU Student Portal, which will provide a gateway to your courses of study, learning resources, and learning communities where you will interact with faculty and other students.

The learning resources in each course are specifically designed to support you as you develop competencies in preparation for your assessments. These learning resources may include reading materials, videos, tutorials, cohort opportunities, community discussions, and live discussions that are guided by course instructors who are experts in their field. You will access your program community during your orientation course to network with peers who are enrolled in your program and to receive continued support through professional enrichment and program-specific chats, blogs, and discussions. WGU also provides Student Services associates to help you and your program mentor solve any special problems that may arise.

Orientation

The WGU orientation course focuses on acquainting you with WGU's competency-based model, distance education, technology, and other resources and tools available for students. You will also utilize WGU program and course communities, participate in activities, and get to know other students at WGU. The orientation course must be completed before you can start your first term at WGU.

Transferability of Prior College Coursework

Because WGU is a competency-based institution, it does not award degrees based on credits but rather on demonstration of competency. However, if you have completed college coursework at another accredited institution, or if you have completed industry certifications, you may have your transcripts and certifications evaluated to determine if you are eligible to receive some transfer credit. The guidelines for determining what credits will be granted varies based on the degree program. Students entering graduate programs must have their undergraduate degree verified before being admitted to WGU. To review more information in regards to transfer guidelines based on the different degree programs, you may visit the Student Handbook found at the link below and search for "Transfer Credit Evaluation."

[Click here for the Student Handbook](#)

WGU does not waive any requirements based on a student's professional experience and does not perform a "résumé review" or "portfolio review" that will automatically waive any degree requirements. Degree requirements and transferability rules are subject to change in order to keep the degree content relevant and current.

Remember, WGU's competency-based approach lets you take advantage of your knowledge and skills, regardless of how you obtained them. Even when you do not directly receive credit, the knowledge you possess may help you accelerate the time it takes to complete your degree program.

Continuous Enrollment, On Time Progress, and Satisfactory Academic Progress

WGU is a "continuous enrollment" institution, which means you will be automatically enrolled in each of your new terms while you are at WGU. Each term is six months long. Longer terms and continuous enrollment allow you to focus on your studies without the hassle of unnatural breaks between terms that you would experience at a more traditional university. At the end of every six-month term, you and your program mentor will review the progress you have made and revise your Degree Plan for your next six-month term.

WGU requires that students make measurable progress toward the completion of their degree programs every term. We call this "On-Time Progress," denoting that you are on track and making progress toward on-time graduation. As full-time students, graduate students must enroll in at least 8 competency units each term, and undergraduate students must enroll in at least 12 competency units each term. Completing at least these minimum enrollments is essential to On-Time Progress and serves as a baseline from which you may accelerate your program. We measure your progress based on the courses you are able to pass, not on your accumulation of credit hours or course grades. Every time you pass a course, you are demonstrating that you have mastered skills and knowledge in your degree program. For comparison to traditional grading systems, passing a course means you have demonstrated competency equivalent to a "B" grade or better.

WGU assigns competency units to each course in order to track your progress through the program. A competency unit is equivalent to one semester credit of learning. Some courses may be assigned 3 competency units while others may be as large as 12 competency units.

Satisfactory Academic Progress (SAP) is particularly important to students on financial aid because you must achieve SAP in order to maintain eligibility for financial aid. We will measure your SAP quantitatively by reviewing the number of competency units you have completed each term. In order to remain in good

academic standing, you must complete at least 66.67% of the units you attempt over the length of your program—including any courses you add to your term to accelerate your progress. Additionally, during your first term at WGU you must pass at least 3 competency units in order to remain eligible for financial aid. We know that SAP is complex, so please contact a financial aid counselor should you have additional questions. *Please note: The Endorsement Preparation Program in Educational Leadership is not eligible for federal financial aid.

Courses

Your Degree Plan includes courses needed to complete your program. To obtain your degree, you will be required to demonstrate your skills and knowledge by completing the assessment(s) for each course. In general there are two types of assessments: performance assessments and objective assessments. Performance assessments contain, in most cases, multiple scored tasks such as projects, essays, and research papers. Objective assessments include multiple-choice items, multiple-selection items, matching, short answer, drag-and-drop, and point-and-click item types, as well as case study and video-based items. Certifications verified through third parties may also be included in your program. More detailed information about each assessment is provided in each course of study.

Learning Resources

WGU works with many different educational partners, including enterprises, publishers, training companies, and higher educational institutions, to provide high-quality and effective learning resources that match the competencies you are developing. These vary in type, and may be combined to create the best learning experience for your course. A learning resource can be an e-textbook, online module, study guide, simulation, virtual lab, tutorial, or a combination of these. The cost of most learning resources are included in your tuition and Learning Resource Fee. They can be accessed or enrolled for through your courses. Some degree-specific resources are not covered by your tuition, and you will need to cover those costs separately. WGU also provides a robust library to help you obtain additional learning resources, as needed.

Mobile Compatibility:

The following article provides additional details about the current state of mobile compatibility for learning resources at WGU.

[Student Handbook article: Can I use my mobile device for learning resources?](#)

Standard Path

As previously mentioned, competency units (CUs) have been assigned to each course in order to measure your academic progress. If you are an undergraduate student, you will be expected to enroll in a minimum of 12 competency units each term. Graduate students are expected to enroll in a minimum of 8 competency units each term. A standard plan for a student for this program who entered WGU without any transfer units would look similar to the one on the following page. Your personal progress can be faster, but your pace will be determined by the extent of your transfer units, your time commitment, and your determination to proceed at a faster rate.

Standard Path for Master of Science in Accounting, Auditing Specialization

Course Description	CUs	Term
Management Communication	3	1
Ethics for Accountants	3	1
Fraud and Forensic Accounting	3	1
Accounting Research and Critical Thinking	3	2
Data Analytics for Accountants I	3	2
Data Analytics for Accountants II	3	2
Advanced Auditing	3	3
Internal Auditing I	3	3
Internal Auditing II	3	3
Information Systems for Accounting and Control	3	4

Changes to Curriculum

WGU publishes an Institutional Catalog, which describes the academic requirements of each degree program. Although students are required to complete the program version current at the time of their enrollment, WGU may modify requirements and course offerings within that version of the program to maintain the currency and relevance of WGU's competencies and programs. When program requirements are updated, students readmitting after withdrawal from the university will be expected to re-enter into the most current catalog version of the program.

Areas of Study for Master of Science in Accounting, Auditing Specialization

The following section includes the areas of study in the program, with their associated courses. Your specific learning resources and level of instructional support will vary based on the individual competencies you bring to the program and your confidence in developing the knowledge, skills, and abilities required in each area of the degree. The Degree Plan and learning resources are dynamic, so you need to review your Degree Plan and seek the advice of your mentor regarding the resources before you purchase them.

Management

Management Communication

This course prepares students for the communication challenges in organizations. Topics examined include theories and strategies of communication, persuasion, conflict management, and ethics that enhance communication to various audiences.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The graduate communicates effectively, both in writing and speaking, within an organizational setting.*
- *The graduate demonstrates best practices to overcome biases that inhibit organizations and teams from communicating effectively.*
- *The graduate recognizes cultural differences in communication and develops strategies and techniques to effectively communicate with internal and external stakeholders.*
- *The graduate applies negotiation and conflict management strategies to improve organizational performance.*
- *The graduate utilizes appropriate technology and/or social media to communicate effectively.*

Accounting

Ethics for Accountants

Ethics for Accountants examines standards of professional conduct and business practices required for accounting professionals. This course will discuss the necessity of applying ethical principles in the application of accounting principles, tax preparation, and attest services to clients. Moreover, the learner will explore how to apply ethical reasoning, various cognitive processes, professional skepticism and ethical decision-making related to situations involving corporate governance and moral dilemmas. Finally, this course will include discussions of the American Institute of Certified Public Accountants' (AICPA) Statements on Standards for Tax Services and the Institute of Management Accountants' (IMA) Statement of Ethical Professional Practices.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner applies ethical reasoning and objectivity to analyze ethical situations.*
- *The learner applies the American Institute of Certified Public Accountants (AICPA) Code of Professional Conduct and the Institute of Management Accountants (IMA) Statement of Ethical Professional Practice to situations involving organizational ethics, corporate governance and independence.*
- *The learner analyzes auditor responsibilities, corporate governance, and motivations for fraudulent financial reporting.*
- *The learner explains auditors' legal liabilities, defenses, and legislative acts.*

Fraud and Forensic Accounting

Fraud and Forensic Accounting provides learners with an in-depth understanding of how fraud and forensic investigations are part of the accounting profession. This course covers the various types of fraud and their impact on organizations, as well as the detection, investigation, and prevention of fraud. This course also introduces the role of forensic accountants in the legal system and the use of forensic accounting techniques in financial investigations. The course will include scenarios and hands-on exercises to provide learners with practical experience in detecting and investigating fraud.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner analyzes types of occupational fraud abuse, schemes, and their prevention and detection.*
- *The learner explains the legal environment of fraud and law-related fraud.*
- *The learner analyzes fraud investigation, interviewing, and reporting techniques.*
- *The learner analyzes methods for fraud prevention and deterrence.*

Accounting Research and Critical Thinking

Accounting Research and Critical Thinking provides learners the skills and knowledge to research and add validity to accounting reports, resolution of issues, and procedural arguments: critical thinking, communication, research strategies, and database resources.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner explains primary and secondary sources of professional research as used in the accounting field.*
- *The learner applies critical thinking and effective writing skills for the professional accountant.*
- *The learner researches financial accounting issues with appropriate tools, including research question development, source validation, and sorted and validated data from public databases.*

Data Analytics for Accountants I

Data Analytics for Accountants I introduces basic concepts and various tools and techniques used in the field of data analytics for accounting. Learners will summarize data analysis definitions and models for the accounting field, explore data mining techniques and the extract-transform-load (ETL) process and create a presentation from accounting data results. This course presents a survey of concepts that provides learners with a basic understanding of how data analytics is used in accounting.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner explains data analysis concepts and models for the accounting field.*
- *The learner explains ethical data mining techniques and the extract, transform, and load (ETL) process as they relate to financial data.*
- *The learner analyzes structured financial data for patterns and trends using descriptive or diagnostic techniques.*
- *The learner creates a consumable presentation from accounting data results.*

Data Analytics for Accountants II

Accountants are no longer confined to being the chroniclers of an organization's profits and expenses—they now leverage the power of data to predict the future and advise leaders on appropriate actions. Data Analytics for Accountants II equips learners with the skills needed to analyze and present data to make reliable forecasts and propose strategies. Emphasis will be placed on auditing, managerial accounting, tax accounting and financial reporting as the learner completes a professional scenario that requires predictive analysis and presenting a course of action. As part of the Master of Accounting Program, this course will cover content that appears in the data analysis portions of Certified Public Accountant (CPA) and Certified Management Accountant (CMA) exams. Data Analytics for Accountants I is a prerequisite for this course.

This course covers the following competencies:

- *The learner creates research questions in order to guide data analysis for a given accounting topic.*
- *The learner applies data analysis techniques for predicative modeling and analysis in a given accounting topic.*
- *The learner recommends a data-driven set of actions for stakeholders.*

Advanced Auditing

Advanced Auditing reviews basic auditing concepts, including (1) planning the audit: identifying, assessing, and responding to the risk of material misstatement; (2) specialized audit tools: attributes sampling, monetary unit sampling, and data analytic tools; (3) completing a quality audit; and (4) reporting on financial statement audits. The second part of the course dives into an application of auditing through (1) understanding how to audit an acquisition and payment cycle and (2) applying the knowledge learned through the acquisition and payment cycle to the revenue cycle in a performance assessment.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner describes materiality, sampling, and data analytic methods as used in auditing.*
- *The learner explains how to complete an audit of a company's financial statements.*
- *The learner explains the appropriate audit and internal control reports that apply to the results of a financial statement audit.*
- *The learner reports on the acquisition and payment cycles during an audit of a company's financial statements.*
- *The learner reports on an audit of the revenue cycle during an audit of a company's financial statements.*

Internal Auditing I

Internal Auditing I provides learners with the basic knowledge and skills necessary to succeed as an entry-level internal audit professional. The Institute of Internal Auditors defines internal auditing as "an independent, objective assurance and consulting activity designed to add value and improve an organization's operations." Topics include the foundations of internal auditing, risk management, governance and controls, and fraud. This course aligns with Certified Internal Auditing (CIA) standards.

This course covers the following competencies:

- *The learner explains the foundational concepts of internal auditing and the Institute of Internal Auditors' (IIA) International Professional Practices Framework (IPPF).*
- *The learner assesses the governance process and internal controls to minimize organizational risks.*
- *The learner evaluates the role of an internal auditor as it relates to information technology risks and fraud risks in an organization.*

Internal Auditing II

Internal Auditing II is a continuation of Internal Auditing I and covers the competencies expected of an internal audit professional in the business world. This course is well aligned to the Institute of Internal Auditors' (IIA) International Professional Practices framework (IPPF) by focusing learner's attention on four domains: the internal audit activity, planning the engagement, performing the engagement, communicating the engagement, and monitoring progress.

This course covers the following competencies:

- *The learner plans an internal audit engagement*
- *The learner performs an internal audit engagement through information gathering, analysis, and evaluation.*

- *The learner communicates internal audit engagement results.*

Information Systems for Accounting and Control

Information Systems I is intended to provide learners with an overview of information systems and information system technology used in the world of accounting. The topics will include networks, hardware, data needs, cybersecurity, and government compliance with privacy and personal information. The course covers a range of topics which accountants may experience and be responsible for in professional life. There are three competencies, and each competency will introduce learners to topics designed to prepare them for the high-stakes assessment.

This course covers the following competencies:

- *Begin your course by discussing your course planning tool report with your instructor and creating your personalized course plan together.*
- *The learner explains proper IT hardware and software needed for effective IT infrastructure management.*
- *The learner applies data management strategies to ensure data accessibility, reliability, and timeliness.*
- *The learner analyzes an organization's information system risk to ensure security, confidentiality, and privacy.*
- *The learner reviews and recommends how to assess business processes and goals to determine the ideal hardware and software acquisitions or implementations for a company.*
- *The learner describes the impact of artificial intelligence (AI) on information systems.*

Accessibility and Accommodations

Western Governors University is committed to providing equal access to its academic programs to all qualified students. WGU's Accessibility Services team supports this mission by providing support, resources, advocacy, collaboration, and academic accommodations for students with disabilities and other qualifying conditions under the Americans with Disabilities Act (ADA). WGU encourages student to complete the Accommodation Request Form as soon as they become aware of the need for an accommodation. Current and prospective students can reach the Accessibility Services team Monday through Friday 8:00 a.m. to 5:00 p.m. MST at 1-877-HELP-WGU (877-435-7948) x5922 or at ADASupport@wgu.edu.

Need More Information? WGU Student Services

WGU's Student Services team is dedicated exclusively to helping you achieve your academic goals. The Student Services office is available during extended hours to assist with general questions and requests. The Student Services team members help you resolve issues, listen to student issues and concerns, and make recommendations for improving policy and practice based on student feedback.

Student Services team members also assist with unresolved concerns to find equitable resolutions. To contact the Student Services team, please feel free to call 877-435-7948 or e-mail studentservices@wgu.edu. We are available Monday through Friday from 6:00 a.m. to 10:00 p.m., Saturday from 7:00 a.m. to 7:00 p.m., mountain standard time. Closed Sundays.

If you have inquiries or concerns that require technical support, please contact the WGU IT Service Desk. The IT Service Desk is available Monday through Friday, 6:00 a.m. to 10:00 p.m. and Saturday and Sunday, 10:00 a.m. to 7:00 p.m., mountain standard time. To contact the IT Service Desk, please call 1-877-HELP-WGU (877-435-7948) or e-mail servicedesk@wgu.edu. The support teams are generally closed in observance of university holidays.

For the most current information regarding WGU support services, please visit "Student Support" on the Student Portal at <http://my.wgu.edu>.
